

Credentialing:

Centralized task management

Ready Doc™
BY INTIVA HEALTH

Problem

Medical credentialing is a tedious and time-consuming process that calls for patience, precision, and attention to detail. There is a lengthy list of credential documents to verify, and the process must be repeated for every individual healthcare provider.

This creates a significant task list for healthcare administrators that must be managed daily, ranging from tracking licenses that may expire, monitoring for Office of Inspector General exclusions, managing provider rosters, tracking appointments and more.

With so many tasks to track at once, it is easy for human error to occur, whether that by entering incorrect information or forgetting an expiration date. And if you're not tracking these tasks in a central location that is easy to manage and that everyone has visibility to, you're making your life harder than it has to be, and risking compliance lapses that can have disastrous consequences.

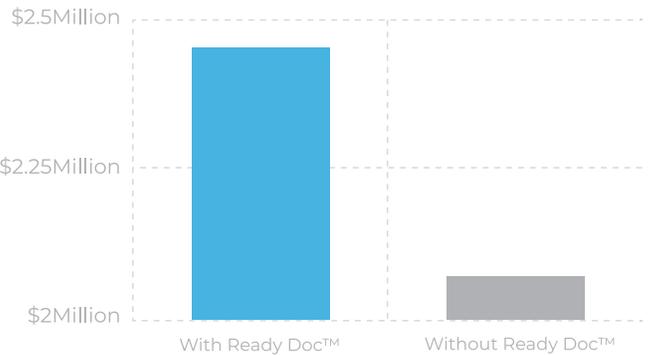

Solution

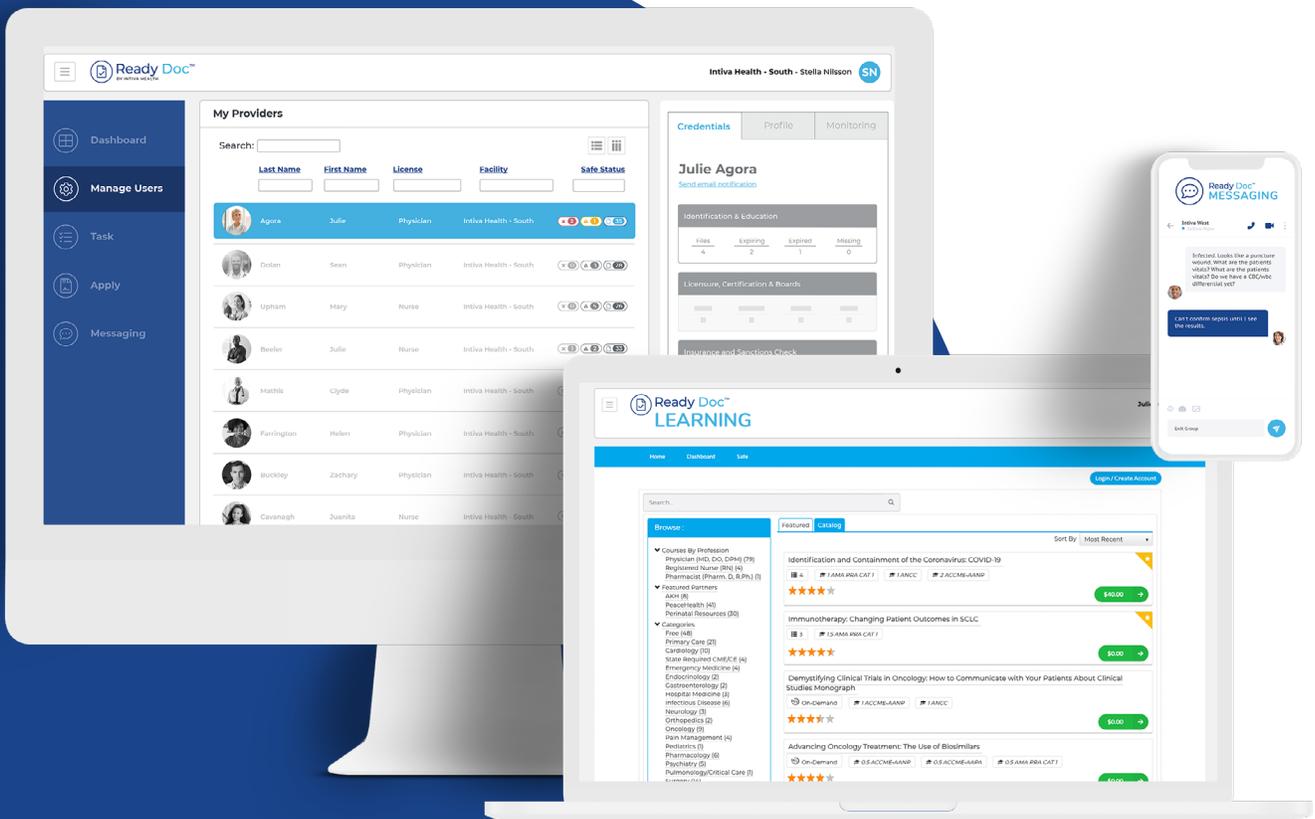

First and foremost, move away from multiple hard copy documents and folders that you may be using to manage and track individual tasks. Additionally, avoid using multiple software that are each uniquely designed to handle an individual task. Adopt a central workplace where you can accomplish all of your tasks, from managing credentials and providers to tracking OIG exclusions and expiration dates for essential licenses.

A secure, digital solution such as Ready Doc™ by Intiva Health offers all of this and more. On average it takes nearly 60 days to credential a physician using manual processes and disparate, disconnected systems. Based on the average revenue a physician brings into a facility, Ready Doc™ offers a potential savings of more than \$400,000 per physician each year.

Yearly savings with Ready Doc™
\$402,740

Total yearly physician-generated revenue after credentialing cost

How Ready Doc™ can help

Ready Doc™ and its built-in Task Manager gives you a place to create tasks related to your providers and helps you track their status from creation to completion. Whether you are credentialing one provider or thousands, Ready Doc™ gives you a way to create and track your credentialing to-do list in the same space where you manage providers and credentials.

Add Provider

The screenshot shows the Ready Doc Task Manager interface. The top navigation bar includes the Ready Doc logo, the user name 'Intiva Health - South - Stella Nilsson', and a profile icon. The left sidebar contains navigation options: Dashboard, Manage Users, Task (selected), Apply, and Messaging. The main content area displays a table of tasks with the following columns: Task, Tag, Assignee, Created by, Date Created, and Due Date. The table contains 10 entries, each with a 'Create Task' button and a 'Completed' checkbox.

Task	Tag	Assignee	Created by	Date Created	Due Date	Completed
Collect onboarding docs		John Smith	John Speer	May 6	May 13	<input type="checkbox"/>
Follow up board	Onboarding	Ayan Monpara	John Speer	Apr 10	Apr 14	<input type="checkbox"/>
Follow up on DEA		Gloria Green	John Speer	Apr 15	Apr 23	<input type="checkbox"/>
Follow up on license Dr. Brown	OBCYN of Maryland	Gloria Green	John Speer	Mar 30	Apr 15	<input type="checkbox"/>
HR New RN	RN New Start	Gloria Green	John Speer	Apr 14	Apr 16	<input type="checkbox"/>
Humana		Gloria Green	John Speer	Mar 11	Mar 31	<input type="checkbox"/>
License Dr. Delgado	Provider License	Samantha Holman	John Speer	May 5	May 28	<input type="checkbox"/>
New Dentist onboarding	Monkey Junction	Gloria Green	John Speer	Mar 20	Apr 22	<input type="checkbox"/>
New Driver	CAP	Gloria Green	John Speer	Apr 17	Apr 29	<input type="checkbox"/>
New Medical Group TX	Texas Ortho	Samantha Holman	John Speer	Apr 9	Apr 30	<input type="checkbox"/>

Ready Doc™ suite

Ready Doc™ Credentialing allows providers (or administrators) to upload all credentialing documents in a secure, online repository. The documents can be easily accessed and shared with anyone that may need to view them. At the same time, the platform offers automated monitoring of the documents for advanced notifications of any documents that may expire, such as medical licenses, DEA licenses, medical malpractice insurance, and every type of document your group requires.

Ready Doc™ Messaging provides HIPAA-compliant communication tools. Care teams can communicate and share protected health information (PHI) on mobile devices or desktop workstations while mitigating the risk of a compliance breach. Ready Doc Messaging also enables groups to facilitate telehealth applications.

Ready Doc™ Learning When health care providers are not managing administrative tasks, securely communicating with their care teams, or providing virtual patient care via telehealth features, they can use the exact same platform to take ACCME-accredited Continuing Medical Education courses to enhance the level of care for their patients and meet state-mandated requirements to renew licenses.

NOW YOU'RE **READY**
